

I do not want you to consider any change to the law in Indiana preventing the telemarketers calling our homes. I have been much happier without the nagging calls at dinner time. This is MY TIME and I work long hours. I do not want to field calls from these people. They are ANNOYING. If you want a national law, that is fine, do not change ours. Make it so the national is part of a commitment to slow these people down, but make sure it does not eliminate the hard work Attorney Steve Carter has done for the State of Indiana. Again, I work long hours and I don't want any services these barracuda's have to offer. I get mail and that is enough. Thank you, Pat Casey
